Dr. Albert B. Sabin
College of Medicine
University of Cincinnati
Cincinnati, Ohio

Dear Dr. Sabin:

I am taking the liberty of writing you to request information concerning the ingredients used in the manufacture of your oral polio vaccine. We are interested in learning whether your process uses nutrients of the type we manufacture by autolysis of brewers' yeast. Such nutrients are in present commercial use in various microbiological processes, and conceivably could be of value in virus production.

Many thanks for your help in this matter.

Very truly yours,

VICO PRODUCTS COMPANY
