DEPARTMENT OF PATHOLOGY

JOHNS HOPKINS HOSPITAL  
BALTIMORE-5, MARYLAND

November 21, 1950

Dr. Albert B. Sabin  
The Children's Hospital Research Foundation  
Elland Avenue and Bethesda  
Cincinnati, Ohio

Dear Doctor Sabin:

Thank you very much for your letter of November 1st concerning my inquiry about the twin fetuses with focal brain and visceral calcification and negative toxoplasmosis serology.

After I read your article (Jour. of Pediatrics 35 (1949) 296-309), I rechecked the slides for the vascular lesions you described, but found nothing similar. I guess we will have to let the cases remain unsolved for the time being. Nevertheless, I do appreciate your helpful suggestions.

If by any chance you still have any reprints of the above article, I would appreciate a copy.

Sincerely yours,

*Jack M. Burnett*  
Jack M. Burnett, M.D.
