HAMILTON HALL

February 17, 1942

Dr. Albert B. Sabin
Children's Hospital Research Foundation
Cincinnati, Ohio

Dear Dr. Sabin:

I am sending you under separate cover our contribution to lymphogranuloma inguinale.

The spinal fluids in which we found the virus were cytologically completely normal. There was no evidence of an increased protein content and sugar. Other chemical examinations were not made. The cell count was not higher than ten round cells. There were no erythrocytes present.

Trusting that this information will be satisfactory, I am

Sincerely yours,

Emmerich von Haam
