

Preservation Lab - Abbreviated Treatment Report

Database ID 1092
 Department Classics Library
 Item Record # i3443835x
 Call Number cl-g PA5610.A533 K3 1927
 Title Kapoies hōres
 Author Anagnostopoulos, Menos
 Imprint

Date Returned to Origin 2/17/2016

1 In-house Repair 1 **Repair/restore binding**
 Performed In-house Repair Catarina
 Staff Type Conservator, Technician, Student T
 Time In-house Repair 275

2 In-house Repair 2 **Mend paper**
 Performed In-house Repair 2 Catarina
 Staff Type Conservator, Technician, Student T
 Time In-house Repair 2 175

3 In-house Repair 3 **Tux Box**
 Performed In-house Repair 3 Catarina
 Staff Type Conservator, Technician, Student T
 Time In-house Repair 3 110

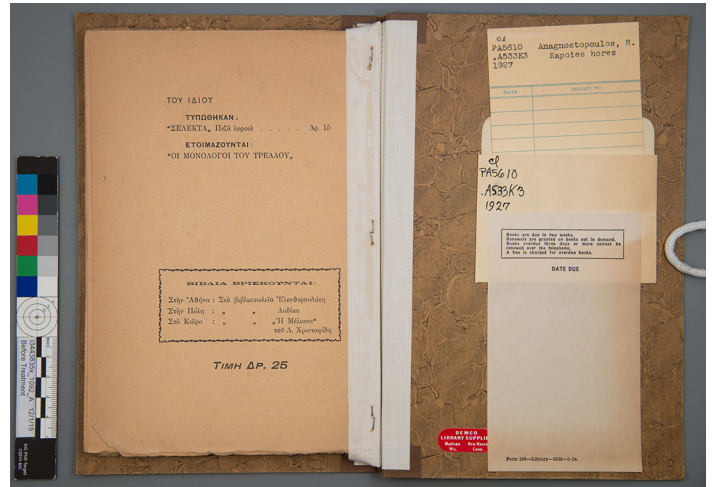

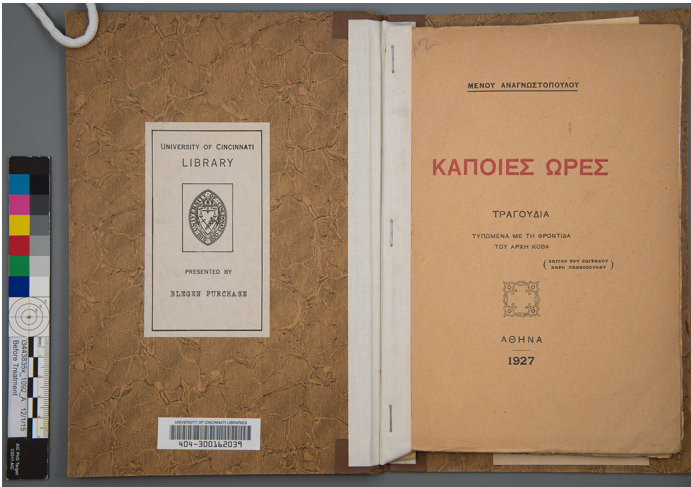

4 Type In-house Repair other **Photographic Documentation**
 Performed In-house Repair other Jessica Ebert
 Staff Type Conservator, Technician, Student T
 Time In-house Repair other 30

Conservator's Note
 (Treatment supervised by Ashleigh Schieszer)

The pamphlet was removed from an inherently acidic pamphlet binder by mechanically removing the corroded staples with a micro spatula and locally removing the cloth hinges with poultices of methyl cellulose. The covers were detached from the text block with poultices of methyl cellulose, and surface cleaned with an Absorbene smoke sponge. Both covers were humidified and washed in filtered water buffered to pH 8 with calcium hydroxide to remove any adhesive still present and to reduce the adhesive stains. Several pages of the text block were guarded with a toned Uso mino kozo tissue and wheat starch paste, and losses were filled with a toned Tengujo tissue and wheat starch paste. Both covers were hinged on to the text block. The upper cover was hinged around the first gathering and the lower cover was hinged around the last gathering, both with acrylic toned Uso mino kozo tissue and wheat starch paste. The gatherings were opened by cutting the edges with a page separating knife. The pamphlet was rehoused in a tuxedo box inside a four flap chemise.
