Conservator's Note

Treatment was conducted on this map of Cincinnati, Newport, and Covington from 1855 in order to repair the tears and provide a housing that allows the map to be safely handled alongside the original cover. The map was dry surface cleaned with an Absorbene smoke sponge to remove any superficial dirt. Areas with grime, particularly along the edges and the back of the map, were also surface cleaned with vinyl eraser crumbs and a vinyl eraser block. The tears were mended from the back with Japanese Tengujo tissue and Zen Shofu wheat starch paste. The map and the detached small original cover of the map were encapsulated in polyester sleeves with Dove gray paper. To provide extra support, both were adhered with double sided tape onto a portfolio made of mat board.
