#### Conservator's Note

This is a new Paddlewheel Steamboatin' Society lapel pin that was recently acquired by the library. It was prepared for display and long term storage by constructing a mount and custom enclosure. The mount was made of Rising Museum mat board, Jade 403 PVA, 80:20 cotton:polyester batting covered with black Cialux cloth. The mount was housed within a tuxedo box constructed out of library board and 3M 415 double stick tape. The tuxedo box was housed within a mat board case with a Canapetta cloth spine so the object would not become lost on a shelf.
